## **RISK DISCLOSURE**

**[seylanbit.com](https://seylanbit.com)**

This Risk Disclosure is issued by SeylanBit (hereinafter referred to as "the Company"), the provider of the Trader's Room service and trading platform, in order to inform Clients about the inherent risks involved in trading on financial markets.

This document does not outline or describe all possible risks or other material aspects of trading in full detail. Rather, it is intended to offer a general overview of the nature of these risks and to help Clients make well-informed investment decisions.

## **1. TRADING RISKS**

1.1. SeylanBit shall not be held liable for any losses incurred by the Client resulting from the selection of inappropriate trading strategies or the failure to adhere to proper risk and capital management principles.

1.2. The Client acknowledges that under abnormal or volatile market conditions, the execution time of trading instructions may be delayed. As a result, the actual execution price of an order may differ from the price originally requested by the Client.

1.3. Trading on margin involves the use of leverage. This means that even small market fluctuations can significantly impact the Client's trading account. The Client understands and accepts the risk of incurring substantial losses, which may exceed the initially invested capital. Clients must be prepared to bear the full risk of losing their entire investment.

1.4. Certain financial instruments may become temporarily illiquid due to limited market demand or other factors. This may prevent the Client from selling such instruments promptly or obtaining accurate pricing and risk information.

1.5. Clients trading in a currency different from their country of residence acknowledge the potential risks associated with currency exchange rate fluctuations, which may impact the value and performance of their investments.

1.6. The Client is responsible for informing themselves about any and all applicable charges, commissions, or fees that may be incurred in connection with their trading activities.

## **2. TECHNICAL RISKS**

2.1. The Client assumes the risk arising from software or telecommunications failures and other technical issues.

2.2. The Company is not accountable for losses sustained by the Client due to the non-adherence to instructions provided in the client terminal user guide.

2.3. The Client acknowledges the risk of executing unintended trading transactions, especially when repeating an order before receiving the results of the last order processing.

2.4. The Client is responsible for safeguarding their passwords and ensuring that third parties do not gain access to the trading system. The Client remains subject to trading obligations, even if their password has been used by a third party, with such obligations shared by both the Client and the Company.

2.5. The Client understands that information transmitted in plaintext (via email, instant messenger service) is not protected from unauthorized access.

2.7. In cases of poor connection between the client terminal and the server, some quotes may not reach the client terminal. The server for live accounts is the sole reliable source of quotes.

### **3. FORCE MAJEURE**

3.1. The Company shall not be held responsible for losses incurred by the Client due to force majeure events, including but not limited to acts of war, terrorist attacks, natural disasters, trading halts on financial markets, currency interventions, government decisions, financial market instability with rapid liquidity drops, and other substantial changes in the processes of counteragents.

### **4. INTRODUCING CHANGES TO THE RISK DISCLOSURE**

4.1. The Company reserves the right to review and amend the Risk Disclosure at its sole discretion. Therefore, it is advisable to regularly review this Disclosure. By continuing to use the website services or visiting it, the Client automatically agrees to any changes made to the Disclosure.
